

voice termination

DELIVERING GROWTH AND RELIABILITY.

Seamless and reliable communications are a requirement in the business world today. Taking your business to the next level means having domestic and international long distance termination with **superior network performance** at competitive prices.

Equipped with long distance voice termination services from USA Digital, your business can rely on our **strong, clear network of connectivity** with industry-leading support and scalability. With over 30 carrier and partner relationships, we can engineer a solution to fit your business.

You pick the protocol. USAD offers dedicated voice services on TDM or IP. IP protocol has the option of secure, VPN or open. For low volume, we can also provide switched long distance.

“dedicated voice services on TDM or IP”

“over 30 carrier & partner relationships”

Intelligent Routing

“Since switching our LD traffic to USAD, we have experienced a significant reduction in cost and fewer LD issues. USAD is clearly the LD provider of choice for our company.”

Migrate to IP. USAD can manage the engineering and implementations for you, on time and right on the money. Our intelligent routing platform directs calls based on underlying carriers’ footprint and completion capability.

Bottom line: we’ll decrease your costs through our buying power and partner relations, resulting in a lower cost of operation. We’ll also **increase your customer satisfaction** through call quality and completion.

The more you get, the more you save with our multi-service discounts.
